*** Notes of Significance ***
 Fires highlighted in yellow have submitted a final ICS-209

[illegible]

Evening Brief

Date: Tuesday August 29, 2017

Weather Summary

***** High Risk for Lightning over Northern Nevada/Utah, Idaho, and Western WY Wednesday *****

***** High Risk for Gusty Winds 15-30 mph Wrn NV Wed *****

***** Near Record Heat Returns to parts of Nevada/Idaho Saturday through Monday *****

Storms may be ongoing from overnight into Wednesday morning over Nevada with much greater thunderstorm coverage expected through the afternoon/evening on Wednesday across most areas of the Great Basin. The most problematic lightning on Wednesday will be across the northern half of the Great Basin where fuels are most critical and storms will be on the drier side along with gusty outflow winds. Thunderstorms will also increase Wednesday over the southern half of NV/UT/AZ Strip, however fuels are less critical in these areas. Thunderstorms may also linger overnight Wednesday into Thursday morning over the eastern half of the region.

The only area of the Great Basin on Wednesday that will see drier weather will be western/northwest NV into possibly far southwest ID. Gusty west winds will develop across western/northwest Nevada on Wednesday afternoon, with speeds in the 25-30 mph range.

Storms will develop again Thursday across much of Utah, southern Nevada and the AZ Strip with drier weather over northern and western areas. A mix of wet/dry storms are still possible on Thursday across the eastern/southern areas but will be trending wetter.

Strong high pressure will build across the Great Basin Friday through the holiday weekend, bringing a return of abnormally hot and dry conditions, with temperatures near record highs.

Preparedness Levels

Great Basin	3
National	5

Great Basin Fire Activity (from Irwin): Moderate Activity

New Fires and Acres: 36 fires for 4,805.34 acres; 5,870 acres large fire growth; 6 new large fires

Resources:

- Crews: 9 T1 IHCs in GB: 7 Committed, 2 Day Off.
 - GBCC has committed an estimated 54+ Type 3, 4, 6 engines.
 - 1-T1 and 4-T2 helicopters are available in GACC.
-

Great Basin Fire Potential Summary

With thunderstorms in the forecast for most of the area this week, some slight moderation of fuels is possible in areas that get low end wetting rains or higher RH from any thunderstorms. However, fuels in many areas will range from normal late summer dryness, to near record levels, with the driest fuels across the mountains of Central Idaho.

Near record temperatures and very dry conditions return region-wide Friday through the holiday weekend with fuels drying out rapidly once again.

We continue to have a Great Basin Fuels and Fire Behavior Advisory in effect for Nevada, Idaho and Utah, available at the following link:

https://www.predictiveservices.nifc.gov/fuels_fire-danger/GB_Fuels_and_Fire_Behavior_Advisory.pdf
